

Homework

Blog

Assignment

- Create blogging tool
- Articles should have title, perex, text and publication date
- System should support tagging of articles, searching by tags, tag cloud
- Administration should be password protected and allow access to multiple users
- Administration should support basic CRUD operations on articles
- Frontend should support listing and detail view of articles

Rules

- if using PHP, do not use server side frameworks (you can create own framework)
- Time limit - 15.3.2021

Notes

- Focus on software architecture, security, user interface and data retention
- Keep in mind clean code and OOP principles
- Preferred technologies - PHP (5.6 / 7) or NodeJS, MySQL, CSS 3

Solution

- Source code of application (PHP, HTML, JS, CSS, ...)
- Database dump
